Git Assignment

✓ Done

Opened: Tuesday, 2 August 2022, 12:00 AM

Due: Tuesday, 16 August 2022, 11:00 PM

Take any program written by you. Call the program and the folder for it as "gitdemo". Create an initial git repo using it.

After the initial first commit, carry out following tasks using "git" on your code.

1. Create a branch "first". Do 2 commits on that branch.
2. Create a branch "second", from the first commit. Do 2 commits on this branch.
3. Merge the branch "second" into the branch "first". This merge should not be an automatic merge and should require manual intervention.
4. Do 2 more commits on the branch "first".
5. Do a rebase of the branch "first" on the branch "master"
6. Create a gitlab repo called "gitdemo" and push your project onto this repo. Note: gitlab, not github. Give abhijit13 developer access to this repo.
7. Submit the link to your gitlab repo here.

The link should look like this: git@gitlab.com:abhijit13/taasika.git

The link should be written in a file called link.txt. Submit the file link.txt.

The link.txt file should have ONLY the link and no other characters in it.
